

## CMB-201-1I Implementing Citrix XenApp Platinum Components

This accelerated learning program provides hands-on, technical training on Citrix XenApp Platinum Edition components. Designed to help experienced IT professionals expand their Citrix skills, this program offers the valuable training needed to properly design, implement, and support multiple Citrix products. The training covers technologies that support the XenApp Platinum offering, including EdgeSight 5.0, Access Gateway 9.0 Enterprise Edition, Provisioning Server 5.0, and Password Manager 4.5. This program will consist of a single track covering 8 days of training in 5 days. Please note that this course does not cover XenApp.

### Audience

This accelerated learning program provides hands-on, technical training on Citrix XenApp Platinum Edition components. Designed to help experienced IT professionals expand their Citrix skills, this program offers the valuable training needed to properly design, implement, and support multiple Citrix products. The training covers technologies that support the XenApp Platinum offering, including EdgeSight 5.0, Access Gateway 9.0 Enterprise Edition, Provisioning Server 5.0, and Password Manager 4.5. This program will consist of a single track covering 8 days of training in 5 days. Please note that this course does not cover XenApp.

### Preparatory Recommendations

- Before taking this course, learners should possess the following knowledge/experience:
- One of the following:
  - CTX-1259: Citrix Presentation Server 4.5 and XenApp 5.0 for Windows Server 2003
  - CTX-4100: Citrix Presentation Server 4.5 and XenApp 5.0 for Windows Server 2003 Skills Update
  - CXA-201: Implementing Citrix XenApp for Windows Server 2008
  - CXA-202: Implementing Citrix XenApp for Windows Server 2008 Skills Update
- CTX-1455 Citrix Common Management Platform 4.5: Administration
- CTX-1325 Citrix Password Manage 4.0: Architectural Overview

Before taking this course, learners should possess the following knowledge/experience:

- Experience with administering Windows Server environments with XenApp
- Experience with network devices, including routers and switches
- Experience with aspects of site architecture, including DMZ and VLANs
- Exposure to basic systems administration concepts, including logging, software upgrade procedures and high availability operations
- Basic knowledge of application and network protocols, devices, and commonly used tools (such as the OSI model, TCP/IP, HTTP, and DNS)
- Working knowledge of commonly used network appliances (such as load balancers, firewalls, routers, and switches)
- Knowledge of AAA (authentication, authorization, and accounting) protocols (such as LDAP or RADIUS)
- Basic knowledge of VPN concepts
- Knowledge of desktop operating systems and desktop security concepts (such as antivirus software and personal firewalls)

## Instructional Method

This course is an instructor-led training course with classroom discussion, demonstrations and the practical application of concepts through hands-on exercises.

## Course Length

5 days

## Registration

## Topic Outline

Provided is the outline for CMB-201-11:

- CAG-200 Citrix Access Gateway 9.0 Enterprise Edition
  - Deploying Citrix Access Gateway
  - Administering Citrix Access Gateway
  - Configuring policies
  - Securing XenApp connections
- CPV-200 Implementing Citrix Provisioning Server 5.0
  - Planning a Provisioning Server installation
  - Installing and configuring Provisioning Server
  - Creating and administering vDisks, devices, and servers
  - Configuring high availability
- CES-200 Implementing Citrix EdgeSight 5.0
  - Installing and configuring EdgeSight
  - Configuring alerts
  - Using real-time data to diagnose issues
  - Using historical data for analysis and reporting
- CTX-1327 Citrix Password Manager 4.5: Administration
  - Installing Citrix Password Manager
  - Creating and managing application definitions
  - Configuring policies, users, and groups
  - Installing and managing the Password Manager agent
