

CTX-1325AW Citrix Password Manager 4.0: Architectural Overview

This course provides an overview of the components, functionality, technical benefits and architecture of a Citrix® Password Manager deployment. Learners are introduced to the features and benefits of the Password Manager architecture and how the product strengthens authentication, encryption and synchronization. This course also describes how security and administrative benefits are provided by the optional components of the Citrix Password Manager Service, including Hot Desktop, Self-Service Password Reset and Data Integrity.

Audience

This course is intended for IT professionals, such as server, network, system and help desk administrators, familiar with Microsoft® Windows Server™ 2003 environments. Systems engineers, analysts, consultants, architects and Citrix accessPARTNER network members are also appropriate candidates for this course.

Preparatory Recommendations

Before taking this course, Citrix recommends that learners successfully complete the following:

- CTX-1455AW Citrix Access Suite 4.0: Common Management Platform Administration

Key Topics and Skills

Upon successful completion of this course, learners are able to perform the following:

- Citrix Password Manager Overview
 - Define Citrix Password Manager
 - Describe the functionality of Password Manager
 - Describe the features and benefits of Password Manager
 - Explain how Password Manager fits into the Citrix Access Suite
- Mandatory Components
 - Define the Central Store
 - Define the Console
 - Define the Agent
 - Define the License Server
- Optional Components
 - Define the application definition tool
 - Define Hot Desktop and Citrix Access Client
 - Define Password Manager Service components and features
 - Password Manager Service Signing Tool
 - Password Manager Service Configuration Tool
 - Data Integrity Module
 - Self-Service Password Reset Module
 - Automatic Key Recovery Module
- Password Manager Functionality
 - Describe the authentication process in Citrix Password Manager
 - Describe the encryption protection provided by Password Manager
 - Describe the intelligent agent response processes in Password Manager
 - Describe the credential synchronization processes in Password Manager
 - Describe the identity verification options
- Technical Benefits of Password Manager
 - Describe the common administrative console and licensing
 - Describe event logging
 - Describe authentication in Hot Desktop and SSPR
 - Describe password policies and sharing groups

Instructional Method

Self-paced eLearning

Course Length

2 hours*

*The course length is an approximation of how long it takes to complete this course. Learners may spend as much time as they need to complete the course, and are able to log on and off as often as desired.

Certification Preparation

This course, along with CTX-1326AI Citrix Password Manager 4.0: Administration, prepares learners to take exam 1Y0-326 Citrix Password Manager 4.0: Administration. Exam 1Y0-326 is a requirement for the Citrix Certified Administrator™ (CCA) for Citrix Password Manager 4.0 and for the Citrix Certified Enterprise Administrator™ (CCEA) for Citrix Access Suite 4.0 certifications.

Registration
